

Many lawmakers and citizens see dollar signs rather than faces when considering Medicaid Managed Care issues in Iowa. Help Disability Rights Iowa show lawmakers that Iowans in the Medicaid Managed Care system are just like them. They want to live in their homes in their communities rather than going to an institution. However, they can't do so without the state sufficiently funding their services.

At the start of the 2018 legislative session, DRI launched the campaign #IamMedicaidIowa with the intention of showing Iowa lawmakers the faces behind Medicaid, not just numbers. The campaign has garnered significant coverage. DRI hopes to continue sending legislators photos and stories of Iowans on Medicaid but we need your submissions to do so. To learn how you can contribute to the #IamMedicaidIowa campaign, visit our [website](#) or [Facebook](#).
